Class I Acc ISIN: GB0032473653

A sub-fund of Henderson Investment Fund Series I, an OEIC managed by Henderson Investment Funds Limited.

## Objectives and investment policy

### Objective

A long-term return (meaning growth of your investment plus income received) that is above the average return expected from an investment in European shares.

### Investment policy

Under normal circumstances, the Fund invests mainly in:

- Shares of European companies in any industry
- The Fund may also invest in:
- Any other type of security that is consistent with its objective
  - Collective Investment Schemes
  - Money market instruments
  - Bank deposits

In choosing investments, the investment manager looks for shares that appear to have the potential to rise in price over the long term and that are undervalued.

The Fund may use derivatives to reduce risk or to manage the Fund more efficiently.

**Designed for** Investors who understand the Fund's risks, want a European-focused investment and intend to invest their money for at least seven years.

This Fund is designed to be used only as one component in several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this Fund.

**Fund currency** GBP

**Share class currency** GBP

### Terms to understand

**Derivatives** Financial instruments whose value is linked to the price of an underlying asset (eg indices, rates, share prices).

**Money market instruments** A short term debt instrument, issued by a government or company as a way to raise money. Generally considered a cash equivalent.

**Shares** Securities that represent fractional ownership in a company.

**Volatility** How sharply the Fund's share price has gone up and down over a period, generally several years.

*You can buy, sell or switch shares in the Fund on any business day, as defined within the "Definitions" Section of the Fund's prospectus.*

## Risk and reward profile

Typically Lower potential risk/reward

Typically Higher potential risk/reward

The value of an investment in the Fund can go up or down. When you sell your shares they may be worth less than you paid for them.

The risk/reward rating above is based on medium-term volatility. In the future, the Fund's actual volatility could be higher or lower and its rated risk/reward level could change.

The lowest category does not mean risk free.

The Fund's risk level reflects the following:

- The Fund focuses on a single region
- As a category shares are, in general, more volatile than either bonds or money market instruments
- Fluctuations in exchange rates may cause the value of your investment to rise or fall

The rating does not reflect the possible effects of unusual market conditions or large unpredictable events. Under normal market conditions the following risks may apply:

**Counterparty risk** The Fund could lose money if a counterparty with which it transacts becomes unwilling or unable to meet its obligations to the Fund.

**Derivatives risk** Using derivatives can involve a higher level of risk. A small movement in the price of an underlying investment may result in a disproportionately large movement in the price of the derivative instrument.

**Liquidity risk** In difficult market conditions certain securities could become hard to value or sell at a desired time and price.

**Management risk** Investment management techniques that have worked well in normal market conditions could prove ineffective or detrimental at other times.

The full list of the Fund's risks are contained in the "Risk Factors" section of the Fund's prospectus.
