# Old Mutual UK Alpha Fund U1 (GBP) Accumulation Units (GB00B946BX62)

A sub fund of Old Mutual MultiManager Trust. Managed by Old Mutual Investment Management Limited

## Objectives and Investment Policy

**Objective:** capital growth by predominantly investing in UK shares (i.e. equities) and similar investments of companies.

**Policy:** the Fund will invest predominantly in UK company shares and similar investments. Companies may be of all sizes (e.g. small, medium and large companies) and in any industry (e.g. pharmaceuticals, financials, etc).

The Fund will typically invest in the shares of fewer than 50 companies, and has no bias to any particular industry or country.

The Fund may invest in derivatives (i.e. financial contracts whose value is linked to the expected price movements of an underlying investment) with the aim of reducing the overall costs and/or risks of the Fund.

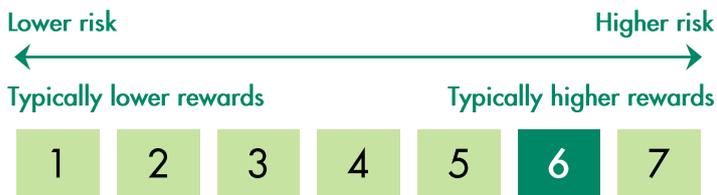

The investment adviser has discretion to select the Fund's investments but in doing so may take into consideration the FTSE All-Share Index.

**Recommendation:** the Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

**Treatment of income:** income from investments will be retained within the Fund. This will increase the value of your shares.

**Dealing:** you can buy and sell shares on any working day in London.

## Risk and Reward Profile

The calculated risk and reward category, as shown above, uses a method of calculation derived from EU rules. It is based on the rate at which the returns of the Fund have moved up and down in the past (i.e. volatility) and is not a guide to the future risk and reward category of the Fund. The category shown is not a target or guarantee and may shift over time. Even the lowest category 1 does not mean a risk-free investment. The seven-category scale is nonlinear, for example, 2 is not twice as risky as 1.

Funds in category 6 have in the past shown relatively high volatility. With a fund of category 6, you have a relatively high risk of losing money but your chance for gains is also relatively high.

**Investment risk** - there is no guarantee that the Fund will achieve its objective. A capital loss of some or all of the amount invested may occur.

**Geographic concentration risk** - a fall in the UK market may have a significant impact on the value of the Fund because it primarily invests in this market.

**Concentration risk (number of investments)** – the Fund may at times hold a smaller number of investments, and therefore a fall

in the value of a single investment may have a greater impact on the Fund's value than if it held a larger number of investments.

**Currency risk** - the Fund is denominated in British Pounds but may hold assets denominated in, or with exposure to, other currencies. The value of your units may rise and fall as a result of exchange rate movements between these currencies.

**Derivative risk** - the Fund may use derivatives to reduce costs and/or the overall risk of the Fund (i.e. Efficient Portfolio Management (EPM)). Derivatives involve a level of risk, however, for EPM; they should not increase the overall riskiness of the Fund. Derivatives also involve counterparty risk where the institutions acting as counterparty to derivatives may not meet its contractual obligations.

**Capital erosion risk** - the Fund takes charges from capital of the Fund. Investors should be aware that there is potential for capital erosion if insufficient capital growth is achieved by the Fund to cover the charges. Capital erosion may have the effect of reducing the level of income generated.

For a more detailed explanation of risks, please refer to the "Risks" section of the prospectus.
