Schroder Asian Alpha Plus Fund

an Authorised Unit Trust of Schroder Unit Trusts Limited

Class L Accumulation GBP (GB00BDD27J12)

This fund is managed by Schroder Unit Trusts Limited, which is a member of the Schroders Group.

Objectives and Investment Policy

Objectives

The fund aims to provide capital growth.

Investment Policy

At least 80% of the fund will be invested in shares of Asian companies, excluding Japan. The fund has no bias to any particular industry.

The fund harnesses our established research capabilities in the Asia (excluding Japan) region. It will have a specific focus on companies with positive cash flow, balance-sheet strength and valuation support. It includes a broadly diversified portfolio of between 50 and 70 companies, where we believe that the current share price does not reflect the future prospects for that business.

The fund may also invest in other financial instruments and hold cash on deposit. Derivatives may be used to achieve the invest-

ment objective and to reduce risk or manage the fund more effectively.

Benchmark

This unit class is managed with reference to the MSCI AC Asia ex Japan NDR financial index. The manager invests on a discretionary basis and is not limited to investing in accordance with the composition of this benchmark.

Dealing Frequency

You may redeem your investment upon demand. This fund deals daily.

Distribution Policy

This unit class accumulates income received from the fund's investments, meaning it is kept in the fund and its value is reflected in the price of the unit class.

Risk and Reward Profile

The risk and reward indicator

The risk category was calculated using historical performance data and may not be a reliable indicator of the fund's future risk profile.

The fund's risk category is not guaranteed to remain fixed and may change over time.

A fund in the lowest category does not mean a risk-free investment.

The fund is in this category because it can take higher risks in search of higher rewards and its price may rise and fall accordingly.

Risk factors

The following risks may affect fund performance.

Currency risk: The fund can be exposed to different currencies. Changes in foreign exchange rates could create losses.

Emerging markets & frontier risk: Emerging markets, and especially frontier markets, generally carry greater political, legal, counterparty and operational risk.

Equity risk: Equity prices fluctuate daily, based on many factors including general, economic, industry or company news.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares.

Operational risk: Failures at service providers could lead to disruptions of fund operations or losses.
